

Stretch - 30 x 33 ft

PRODUCT SHEET

EXAMPLE FORMULAS

1. Ceremony   145

2. Cocktail   110

3. Walking dinner   85

4. Seated dinner   55

Important note!

The formulas above give an indication of the maximum capacity. If you wish to add a bar, stage, dance floor, etc., we will have to account for some extra space. Our Project Managers are always at your disposal to give advice and work out a custom made proposition for you.

DESCRIPTION

Stretch tents have a unique flexibility, as they can be set up free-standing or can easily be attached to all kinds of walls/buildings to extend a terrace or outdoor space. Trees, bushes, lighting poles or other obstacles can easily be integrated into a set-up.

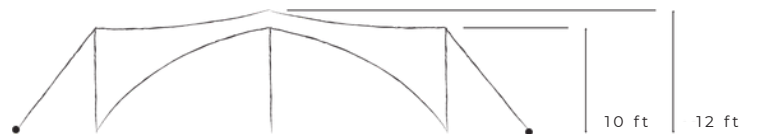

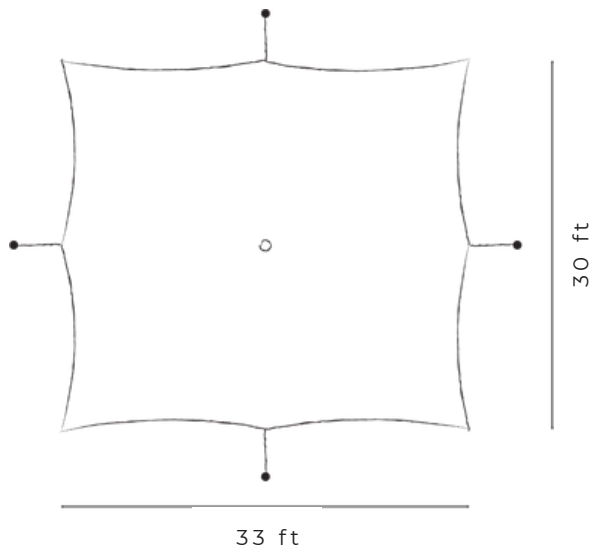

Stretch tents are available in an extensive range of sizes and shapes.

Organic stretch tents are modular and can be interconnected. To make the connected tents waterproof, a gutter can be installed.

TECHNICAL DRAWING

The standard set-up for a Stretch tent is an open configuration in order to use as much space as possible. In the case of an 30 x 33 ft tent, the four corners will be pulled down, creating a cosy indoor area.

OTHER CONFIGURATIONS

A great advantage of Stretch tents is that there are endless possibilities regarding the set-up. In case of an 30 x 33 ft Stretch tent, there is also the option of closing one, two or three sides of the tent. The pictures show some examples of a half open configuration.

Stretch - 33 x 66 ft

PRODUCT SHEET

EXAMPLE FORMULAS

1. Ceremony   325

2. Cocktail   245

3. Walking dinner   195

4. Seated dinner   125

TECHNICAL DRAWING

The standard set-up for a Stretch tent is an open configuration in order to use as much space as possible. In the case of an 33 x 66 ft tent, the four corners will be pulled down, creating a cosy indoor area.

OTHER CONFIGURATIONS

A great advantage of Stretch tents is that there are endless possibilities regarding the set-up. Thus, it is possible to close one or more sides, by pulling them down to the ground. However, the available surface area will be somewhat smaller in such cases. Below you will find some examples of (partially) closed Stretch tents.
